GOD IS WITH US...

Dear Friends, we are in a time where everything is changing so fast. What we knew before somehow doesn't work well now and the things we presumed we knew only brought us to the truth of our ignorance. So one can say, nothing is constant! Hmm...is it?

Here, nestled in this simple island is a small kindergarten school where kids learn the basics of life. Here they learn their simple ABCs and Chinese characters. They experience the wonder of friendship, the sheer excitement of knowledge as they become aware of things around them. They too, are changing, evolving, blooming and coming to fruition. Then, really nothing is constant!

But who do not want change? We human beings are by nature always searching for something, curious for something new, enthusiastic for things different and excited to embark on a journey. We keep on moving. This might be quite evident and true here in Hong Kong where people are always in transit. This is a place with diverse culture, so we see the constant exodus of people. One time they are here but just when you start to get to know them, the next time they are moving to a different place and country. This is also true of the students here in the kindergarten, there are always new faces. Thanks to the unrelenting effort of the principal, teachers and staffs of this school, because of them these children learn the truth of what is constant, of this something and Someone that is always, I really mean, always, there for them, wherever they go, whoever they be and whatever they do. We know in growing kids it is important that they have something that is constant, that even if everything changed they can always go back to something that is ever present, and that will bring them Home. Everyday they are being led to the truth of God's presence in our lives. Through their activities, songs and plays, they are always given that chance to feel what is eternal - God's love. That is the mustard seed being sown in the young hearts of these kids and if given the proper care and chance they grow to be strong and sturdy trees that bear fruit.

It is only God's loving presence that will keep our hearts attune to happiness and good things. What more precious gift and legacy to give our children than this? In a world full of lies and deceit let us give our children what is true, for if they live in the truth, then they are free. Regardless of what religion we have, or even if we do not believe in God, He will always be here for us. God holds us in His hands and for Him, loving us just flows like a stream of fresh cool water that refreshes us.

GOD is with US ...loving us.
